

## TMMi test process improver

Coming soon the release of a new scheme. TMMi Foundation is proud to release Certified TMMi test process improver. We will keep you posted. As soon as the release date is known, you can find a news item on our website, LinkedIn and Twitter.

Organizations seeking to improve their level of test maturity using the TMMi Model depend on experienced and qualified individuals to effectively assess and facilitate test process improvement. This qualification is intended to support career path development and create visibility for those involved in

TMMi based test process improvement.

### A certified TMMi test process improver:

- is able to initiate and manage a test improvement project, and successfully implement TMMi based improvements in an organization or project.
- Has advanced knowledge and skills in the areas of testing, TMMi, process improvement and assessments.
- can use the associated logo, e.g., as an email signature, to show their achievement to their stakeholders and the market
- is a career step for those involved in test consultancy and test process improvement.

By having employees that hold the TMMi test process improver certificate, an organization can show to their stakeholders and to the market that they have the expertise to perform TMMi based test process improvement activities successfully.

## TMMi model for test process improvement is #1 in the world

According to [IEEE research paper](#) by several universities, the TMMi model for test process improvement is now confirmed as being the #1 in the world. The TMMi model is more than 3 times more popular than the model for test process improvement in second place.

## Increasing number of TMMi Professional exams taken

There have been 3 times more TMMi Professional exams taken during the 2nd quarter of 2018 in relation to the same quarter of 2017. The [TMMi Foundation](#) is also happy to announce that there is a current pass rate of 82%. A huge thank you to all the incredible participants, recognized TMMi training providers and local chapters for this wonderful achievement!

## Two new TMMi local chapters

Turkey and Poland are the two newest local TMMi chapters, which brings up the total number of chapters to 12! Welcome Turkey and Poland.

TTB President Koray Yitmen on TMMi Local Chapter for Turkey

"In the age of continuous integration, continuous delivery, and continuous deployment, one can't imagine a software development process without continuous testing. A healthy continuous testing competency requires solid test processes, and continuously adapting and improving the test processes according to the changing needs of the market and the new software development lifecycle (SDLC) frameworks. Whether Agile, iterative, or sequential methodologies or frameworks you are using for your SDLC, #TMMi is laying down the foundations of a healthy test process. Turkish Testing Board is happy to collaborate with TMMi to help Turkish IT community create better software faster."

**Koray Yitmen**

Turkish Testing Board (TTB) President.

Karolina Zmitrowicz, Chair of Polish Testing Board, on TMMi Local Chapter for Poland

W. Edwards Deming said: *Quality comes not from inspection, but from improvement of the production process. I strongly believe this statement is still valid.* Typical IT organizations focus too much on testing and quality control of solutions. These are certainly important activities from the point of view of ensuring the quality of the final product, but from the perspective of the development process effectiveness it is also a kind of waste.

That is why we want to promote methods that enable us to reduce waste while increasing the chances of achieving high quality products. One of such methods, which effectiveness and value is confirmed by the experience of many companies, is TMMi.

With these products we can achieve higher quality of testing processes, which can lead to higher quality of development processes and - in the end - to higher quality product.

**Karolina Zmitrowicz**

Chair of Polish Testing Board,  
Leader of TMMi Polish Local Community

## White paper on DevOps and TMMi

The last mile is the longest, but our release candidate of our DevOps white paper "How TMMi supports the Three Ways of DevOps" is almost ready. Matthias Rasking and his team have gone through all the findings done in the review of our DevOps white paper and improved it. When the white paper is ready, it can be downloaded from our TMMi website. [Follow us on LinkedIn](#) to be one of the first informed when it is released (expected September, 2018).

## Updates from companies using TMMi

### Recognized TMMi Professional training providers

CEPREI of Guangzhou, China (<http://www.ceppei.org/>) is the newest recognized training provider of TMMi Professional.

### Accredited TMMi Assessment Service Providers

Recently H3C of China (<http://www.h3c.com/en/>), a leading company in digital solutions, has been re-accredited as an official TMMi Assessment Service Provider.

### TMMi certified organizations

Manthra Software Services of Malaysia (<http://manthrasoft.com/>) have gone from TMMi level 3 to TMMi level 5

## Conferences and events

- Our CEO, Erik van Veenendaal is giving a keynote on 'TMMi in context; ISO29119 and Agile' on September, 3<sup>rd</sup> at [Softec Asia 2018](#)
- Karolina Zmitrowicz (chair of the Polish TMMi local chapter) speaks on [TestCamp](#) about 'Improving Maturity with TMMi' on September, 22<sup>nd</sup> in Wroclaw, Poland
- Clive Bates (chair of the TMMi accreditation panel) will present 'Create Success From Your Failures' on the [9<sup>th</sup> International Software Quality Engineering](#) Forum of CSTQB, which will be largely dedicated to TMMi, in Guangzhou on September, 28<sup>th</sup>.
